EDUGENIE – PROJECT DEVELOPMENT PHASES

7. Project Documentation Phase

The documentation phase records the complete development process of EduGenie.

The project documentation contains:

1. Introduction

Provides an overview of EduGenie and the problem it solves.

2. Objectives

Describes the goals of developing an AI-powered learning assistant.

3. Requirement Analysis

Documents hardware, software, functional, and non-functional requirements.

4. System Design

Contains:

- Architecture.
- Folder structure.
- Module design.
- API design.
- Data flow.

5. Implementation

Describes the development of:

- Q&A.
- Explanation.
- Quiz.
- Summary.
- Learning Path.
- Frontend.
- Backend.

6. Testing

Contains test cases and testing results.

7. Screenshots

Screenshots of the working application are included to demonstrate:

- Question answering.
- Topic explanation.
- Quiz generation.
- Summarization.
- Learning recommendations.

8. Future Enhancements

Possible future improvements include:

- Voice-based learning.
- Multilingual support.
- Mobile application.

- Progress tracking.
- Gamification.
- Teacher and parent dashboards.
- Image/PDF-based question answering.
- LMS integration.

9. Conclusion

The documentation provides a complete record of the development, implementation, testing, and results of the EduGenie project.
