# EDUGENIE – PROJECT DEVELOPMENT PHASES

## 8. Project Demonstration Phase

The final phase is the demonstration of the completed EduGenie application.

During the demonstration, the complete workflow of the application is shown to the evaluator.

### Demonstration 1 – Asking Questions

The user enters:

**“Which is the largest ocean?”**

EduGenie processes the question and displays the AI-generated answer.

### Demonstration 2 – Concept Explanation

The user enters a topic such as:

**“Pythagoras Theorem”**

The system generates a simplified explanation that is easier for students to understand.

### Demonstration 3 – Quiz Generation

The user enters a topic or passage.

EduGenie generates:

- 3 questions.
- 4 options for each question.
- Correct answers.

The user can select an option and receive feedback.

## Demonstration 4 – Summarization

A lengthy educational paragraph is entered into the system.

EduGenie processes the content and displays a shorter summary containing the important information.

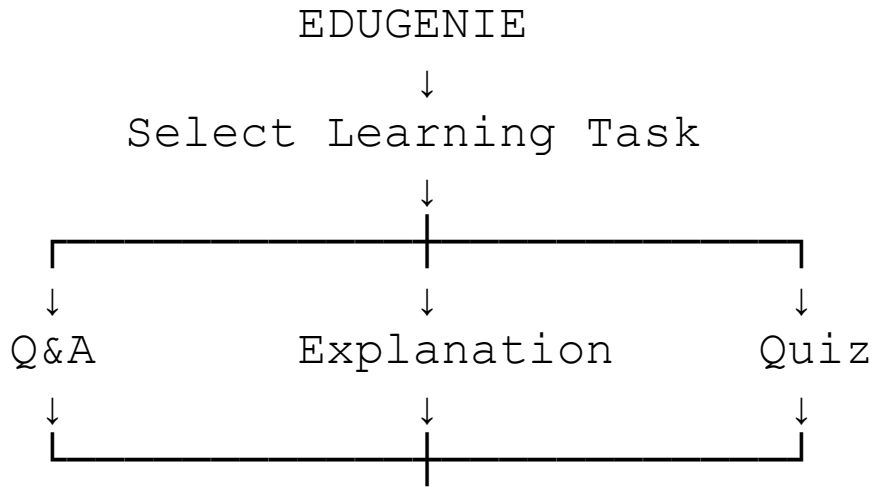

## Demonstration 5 – Learning Path

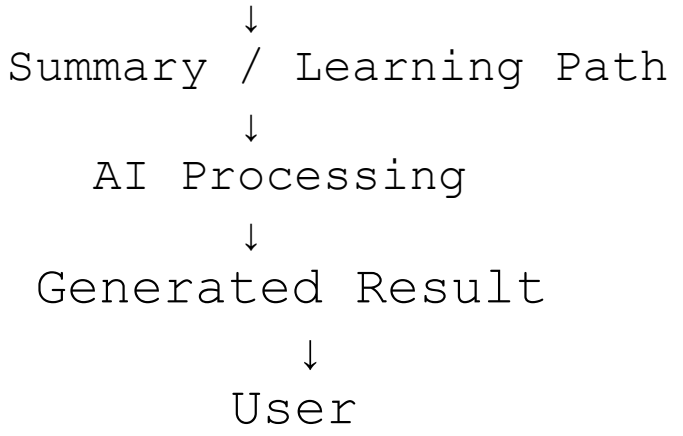

The user enters:

**“SQL”**

EduGenie generates a structured learning plan containing beginner, intermediate, and advanced topics along with suggested learning resources.

## Final Demonstration Flow

## Final Outcome

The completed EduGenie application demonstrates how Generative AI can be integrated with a simple web application to create an interactive learning assistant. The eight development phases—from **idea generation to final demonstration**—provide a systematic approach for developing, testing, documenting, and presenting the project.
